## DETAILED ACTION

### *Remarks*

1. Claims 1-8, and 11-24 were canceled. Pending claims are amended claims 9-10 and 25-26 for reconsideration.

### *Allowable Subject Matter*

2. Claims 9-10 and 25-26 are allowed.

### *Reasons for Allowance*

3. The following is an examiner's statement of reasons for allowance:

The prior art of record to Sigler and Brown fails to either alone or combine to teach or suggest a communication device and its corresponding method for reducing latency in a group communication network, wherein the communication device comprises a receiver, a memory unit, a transmitter as cited in claims 9 and 25 and with the additional step of "signaling the user to stop sending media if a memory unit for buffering the received media runs out of space before the request is completely processed and media communication is not established between the communication device and the controller" and "transmitting the buffered media to a target receiver if a memory unit for buffering the received media runs out of space before the request is completely processed but media communication is established between the communication device and the controller" as cited therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
